1. System Overview

Akuvox SmartPlus is a cloud-based platform on which installer can conduct integrated management of building, apartment, office, residents, office staff and personnel, devices, relays for community scenario and office scenario, as well as the remote maintenance service for all the devices deployed in the two scenarios.

➤ **Installers using this platform will be able to:**

- Add, edit, and delete the community, office, building, apartment, device, residents, staff and personnel.
- Deploy and set up devices and relays for the access control.
- Check and upgrade device firmware.
- Check and manage MAC library.
- Conduct remote operations such as Autop provisioning, device reboot, transmission type modification, and remote maintenance.
- Download the related technical manual and get access to the Akuvox ticket system for technical support.
- Subscribe and renew Akuvox SmartPlus.

2. Login in to SmartPlus

You can log in SmartPlus platform using the user account information you obtain from your distributor.

1. Open the web browser and enter the address (URL) of the SmartPlus server location in your area, and press **Enter**.
2. Enter your username and password.
3. Click on **Login** to log in to the SmartPlus platform.

Login

Login

- You can click on **Log out** if you want to log out of the SmartPlus platform.

3. Prior to the Management

It is advised that you go through what are listed below before you start your management. and the list below is applicable to both community user management and office user management.

- Check if all of device MAC addresses have already been registered by your distributor.
- Check if the firmware in your devices supports cloud mode with no connection to SDMC.
- Check if your device is powered on and is connected to the internet and make sure that the network is normal.
- Check and make sure that your resident information and device information are correct.

4. Main Interface

The main interface mainly consists of seven modules that are incorporated as a whole to allow you to manage the building, apartment, office, devices, residents, access control, office staff and personnel in both community buildings and office buildings.

● Module Description:

No.	Modules	Description
1	Dashboard	Allows you to manage community, office, building, apartment, resident, office staff, personnel, device and property manager.
2	<ul style="list-style-type: none"> ● Residents and Device ● People and Device 	Allows you to manage building, apartment, devices, residents, access control, office staff and people in both community and office.
3	Firmware	Allows you to check device firmware information.
4	Update	Allows you to update the firmware version for the specific device.
5	MAC Library	Allows you to register the MAC in the MAC library.
6	Subscriptions	Allows you to activate the Akuvox SmartPlus service for the resident by paying the activation fees and renewing the fees, etc.
7	Payments	Allows you to check for the information related to transactions made.

5. Community/Office Management

5.1. Community Scenario

5.1.1. Create Community

A community must be created first on the dashboard before you can proceed to the other management involving devices, residents, etc.

1. On the upper left corner of the dashboard, select **Community**.
2. Click **+ New Community** on the dashboard.

6. User Management

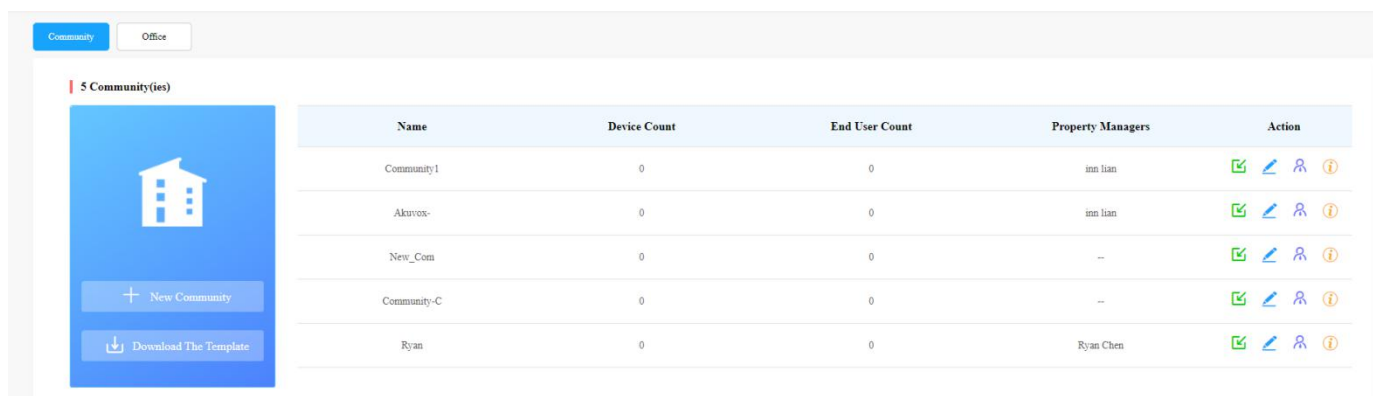

Community users are managed on a community basis, while office users are managed on office basis. And you are required to go to the specific community or office for the management of the users by moving them into the specific building, apartment, and department.

6.1. Add Community Users

6.1.1. Add Community Resident to a Building

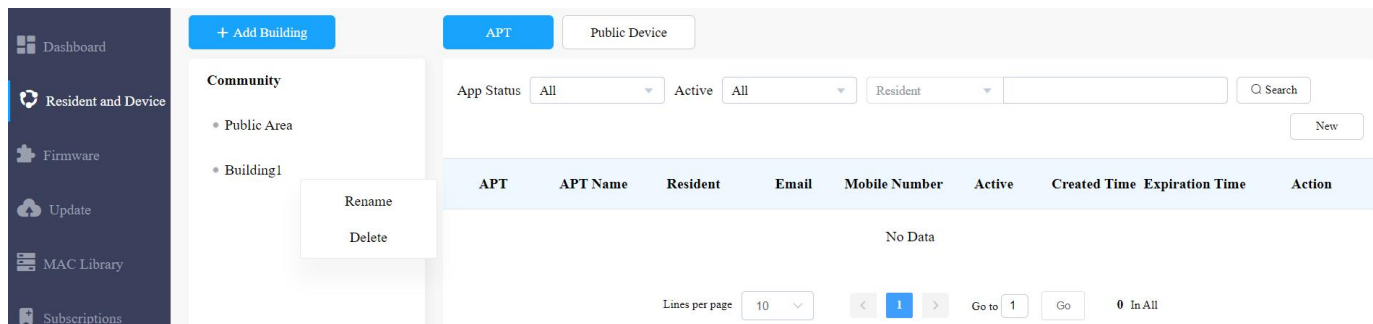

After the community is created, you are required to add buildings in the community, then you can start adding the residents to the building you added.

1. Click on  of the community you intend for the management (it will automatically skip to the **Resident and Device** module).

Name	Device Count	End User Count	Property Managers	Action
Community1	0	0	inn lian	   
Akuvox-	0	0	inn lian	   
New_Com	0	0	--	   
Community-C	0	0	--	   
Ryan	0	0	Ryan Chen	   

2. Click on **+ Add Building** to add a building, and rename the building if needed.
3. Click on **APT**, then click on **New** to add resident.

APT	APT Name	Resident	Email	Mobile Number	Active	Created Time	Expiration Time	Action
No Data								

4. Fill in the apartment and resident's information.

Note:

- Device selection will not be shown if you switched off the home automation service when you create a community.

● **Setting Description:**

No.	Field Name	Description
1	APT	Fill in the resident's apartment number.
2	APT Name	Fill in the resident's apartment name.
3	Device	Enter the indoor monitor MAC address, which is required for adding an apartment. Device selection is displayed only when you have selected Basic in the feature plan.
4	Arming Function	Enable the arming function so that the arming icon will be available on your SmartPlus app for arming and disarming.
5	Network Group	Select the network group. Devices in the same building need to be set up in the same network group.
6	Location	Fill in the location of the device.
7	Relay1/2	Fill in the relay name, which can be the device's location.
8	First Name	Fill in the resident's first name.
9	Last Name	Fill in the resident's last name.
10	Email	Fill in the resident's email.
11	Language	Select the language of the emails notifying the user account information. Currently 12 languages are supported: English, Simplified Chinese, Korean, Japanese, Turkish, Polish, Russian, Spanish, Bosnian, Danish, Vietnamese, French
12	Mobile Number	Enter resident's mobile phone number.
13	Country/Region	Select the country or region code of the user.
14	Landline 1/2/3	Fill in the user's landline numbers, eg mobile phone numbers or telephone numbers. Three landline numbers are supported.
15	Call Type	Select your call type.
16	SIP Call or IP call	Select " All my devices were installed in the same place (villa or house) " for IP call if all of the user's intercom devices are in the same LAN (Local Area Network). If not, select " Some of my devices were installed in the different place (villa or house) " for SIP call .

Note:

- When adding an indoor monitor, you can set up and name the relays for the device. The relay name will be synchronized to the SmartPlus app. The relay status will also be updated following the changes that occurred on the indoor monitor.

6.1.2. Add Community Residents to a Building Using Template

The template can maximize your efficiency in the management of the resident especially when you are handling a large number of residents for a specific community.

- Download the template on the dashboard.
- Fill in the information in the template.
- Import the template to the community you selected.

2	Building#2		403 Ryan		Ryan	Chen						
3												
4												

Note:

- If you select feature plan-Basic, the template must contain indoor monitor MAC address.

● **Template Description:**

No.	Settings	Description
1	Building	Fill in the building number or name. Note: should not be more than 128 characters in length.
2	Apt	Fill in the apartment number. Note: must be 1-6 digit integral number(s).
3	Apt Name	Fill in the apartment name.
4	Device	<ul style="list-style-type: none"> ● Device Type Code: Multi-tenant door phone=0 Single-tenant door phone=1 Indoor Monitor=2 Guard Phone=3 Access Control=50 ● Device Setting Format: "Device location, Device type, Device MAC". Eg: Gate2,0,0C11050B9814; Living Room,2,0C11050893C6 Note: every two devices need to be separated by ";". Note: Device MAC must be added first in the MAC library of the community to which you want to import the data.
5	First Name	Fill in the resident's first name. Note: should not be more than 64 characters in length.
6	Last Name	Fill in the resident's last name. Note: should not be more than 64 characters in length.
7	Email	Fill in the resident's Email.
8	Mobile Number	Fill in the resident's mobile phone number.
9	Telephone Calling Code	Fill in the resident's country code.
10	Phone1/2/3	Fill in the resident's mobile phone number.
11	Call Type	Call Type Code: SmartPlus and indoor monitor=0 Phone and indoor monitor =1 SmartPlus and indoor monitor, with phone as backup =2 Indoor monitors with=3 Indoor monitors with phone as backup=4 Indoor monitors with smartPlus as backup, finally phone=5 Eg. "Indoor monitors with smartPlus as backup, finally phone=5" means the call will be received in sequential order, first by indoor monitor, then SmartPlus app, and last mobile phone.

6.1.3.Edit/Delete Community Resident

You can edit and delete the resident and the resident apartment if needed.

Note:

- You can only edit and delete the residents that have been moved in to apartments by the property manager.

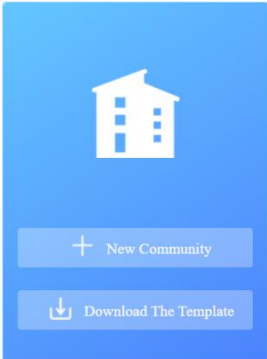

- Click **Resident and Device** module.
- Select the building and apartment of the resident.
- Click to delete the resident and click to edit the resident's information.

6.1.4.Add/Edit/Delete Family Members for Resident

After you added the residents, you can start adding family member accounts for the SmartPlus app. Family member accounts can be edited and deleted afterwards.

1. You start by selecting the resident's community. You can click  of the resident's community.

● Template Description

No.	Settings	Description
1	Department	Fill in the department name or number. Note: should not be more than 128 characters in length.
2	Device	<ul style="list-style-type: none"> Device Type Code: Multi-tenant door phone=0 Single-tenant door phone=1 Indoor Monitor=2 Guard Phone=3 Access Control=50 Device Setting Format: "Device location, Device type, Device MAC". Eg: Gate2,0,0C11050B9814; Living Room,2,0C11050893C6 Note: every two devices need to be separated by ";". Note: device MAC must be added first in the MAC library of the community to which you want to import the data.
3	Identity	Select the office users identity: staff or personnel.
4	First Name	Fill in the office staff or personnel's first name. Note: should not be more than 64 characters in length.
5	Last Name	Fill in the staff or personnel's last name.

		Note: should not be more than 64 characters in length.
6	ID	Enter the ID number of Staff or people. The ID should be unique and cannot be repetitive.
7	Email	Fill in the user's Email.
8	Mobile Number	Enter the mobile phone number of the staff or personnel. The mobile number here is used for user account registration only.
9	Telephone Calling Code	Fill in the resident's country code.
10		<ul style="list-style-type: none"> ● Device Type Code: Multi-tenant door phone=0 Single-tenant door phone=1 Indoor Monitor=2 Guard Phone=3 Access Control=50 ● Device Setting Format: "Device location, Device type, Device MAC". Eg: Gate2,0,0C11050B9814; Living Room,2,0C11050893C6 Note: every two devices need to be separated by ";". Note: Device MAC must be added first in the MAC library of the community to which you want to import the data.
11	SmartPlus Intercom Feature	Enter 1 to allow users to use SmartPlus app and enter "0" to disable the SmartPlus app service.
12	Phone	Fill in the landline number of the office staff or personnel to receive incoming calls.
13	Call Type	Call Type Code: Smartplus=0 Phone=1 SmartPlus with phone as backup=2 For example: "SmartPlus with phone as backup" means the call will be received in sequential order, first by SmartPlus app, and last by mobile phone.

Note:

- You can import both staff and devices or people and devices at the same time using one template.

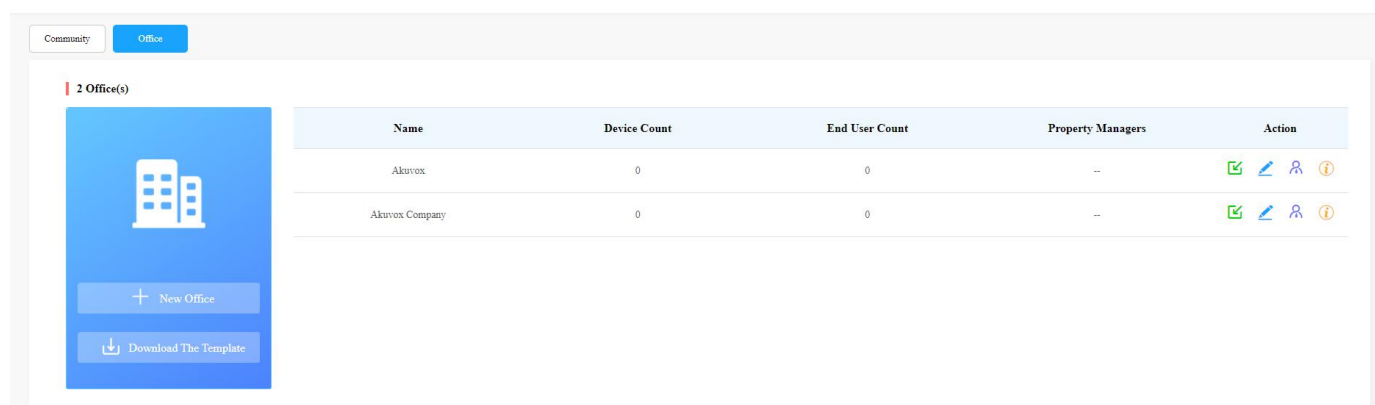

6.2.3.Edit/Delete User in Department

You can edit and delete office users in a department if needed.

Note:

- You can only edit and delete the office users who have been moved into a specific department by the office property manager.

- On the office dashboard, click on  of the office you intend for the management (it will automatically skip to the **People and Device** module).

Name	Device Count	End User Count	Property Managers	Action
Akuvox	0	0	--	
Akuvox Company	0	0	--	

- Select the department.

3. Click  to delete the user, and click  to edit the user's information.
4. On the upper right corner of the screen, click  to edit the user information.

6.2.4. Search/Edit/Delete Users in Office

1. On the office dashboard, click on  of the office you intend for the management (it will automatically skip to the **People and Device** module).

7. Device Management

You can manage the devices deployed in communities and offices. For community devices, you are required to go to the specific community and specific building to manage the device. For office devices, you need to go to a specific office and a specific department to manage the office devices.

7.1. Community Device Management

7.1.1. Add Device to a Building

After the community is created, you are required to add buildings in the community, then you can start adding the devices to the building you added.

1. Click on  of the community you intend for the management (it will automatically skip to the **Resident and Device** module).

5 Community(ies)

Name	Device Count	End User Count	Property Managers	Action
Community1	0	0	inn lian

Note:

- When adding an indoor monitor, you can set up and name the relays for the device. The relay name will be synchronized to the SmartPlus app. The relay status will also be updated following the changes that occurred on the indoor monitor.

Note:

- When you set the device type as Indoor Monitor, you can tick the checkbox of that ☐ Arming Function that will appear so that the arming icon will be available on your SmartPlus app for arming and disarming.

- Setting Description:**

No.	Field Name	Description
1	MAC	Fill in the device MAC address.
2	Device Type	Fill in the type of device.
3	Network Group	Select the network group. Devices in the same building need to be set up in the same network group.
4	Contact Setting	Select the contact screen display on the door phone.
5	Location	Fill in the location of the device.
6	Relay1	Fill in the relay name, which can be the device location.
7	DTMF code	Enter the DTMF code for the door access.
8	Unlock	"unlock in homepage" means unlock can be done on the home screen, while "unlock in talking page" means unlock can be done while talking.
9	Add Relay	You can add more relays if needed.

7.1.2.Add Devices to a Building Using Template

The template can maximize your efficiency in the management of the devices especially when you are handling a large number of devices for a specific community.

- Download the template on the dashboard.
- Fill in the information in the template.

3. Click  of the community to which you want to Import the template.

● Firmware List Description

No.	Field Name	Description
1	Version	Displays the firmware version number.
2	Model	Displays the device model.
3	Version Log	Generally displays remarks on the version.
4	Created Time	Displays when the firmware is uploaded.
5	Action	Click to check the detailed firmware information.

10.2.Update Firmware

You can update the device firmware to the firmware version you selected according to the update timing you defined.

1. Go to **Update** Module.
2. Click on **Add**.

3. Select the device model and the firmware to be upgraded to.
4. Select the specific device(s) and update timing.

10.3.Check and Edit Firmware Update List

After you update your device firmware, you can not only check your firmware update status, but

also edit the update setting for devices pending the upgrade. And you can delete the specific record as well.

1. Search the firmware status by **All, Pending, Processing, Executed**.
2. Edit the update setting for the devices pending the update.
3. Delete the specific update record if needed.
